Morton Bailey, a prominent banker, of Canada, was the speaker. He said: "At the present time the faint prospect of war between England and the United States has raised the question of Canada's chances to resist invasion. It has none. Except at Halifax and Vancouver, there are no fortifications or means of defence. The militia consists of some dozen regiments, aggregating, say, 10,000 men. The forces of the United States could take Montreal and Quebec easily, and all the country west of these places would mean only a holiday parade for the forces the United States could send. The English would probably confine their attention to the defence of Halifax and Vancouver, as the whole English Army could not defend the line of the Canada Pacific, and if trouble broke out at one point its entire usefulness would be destroyed. The proper course for the United States to pursue in the unlikely event of frouble would be occupy two or three points, to break the line of communication, and leave the balance of the country to itself." The speaker also touched upon the annexation movement, which, he said, was confined to a small circle, the great mass of the people being intensely loyal. ern Neighbors and Their Customs." A. Morton
